

# **Final Group Report**

## **Personal Library**

### **Project Story:**

Personal Library is a platform designed for users to manage, rate, and review the movies, books, and games they engage with. Users can add each piece of content to their personal library, assigning individualized ratings and providing comments.

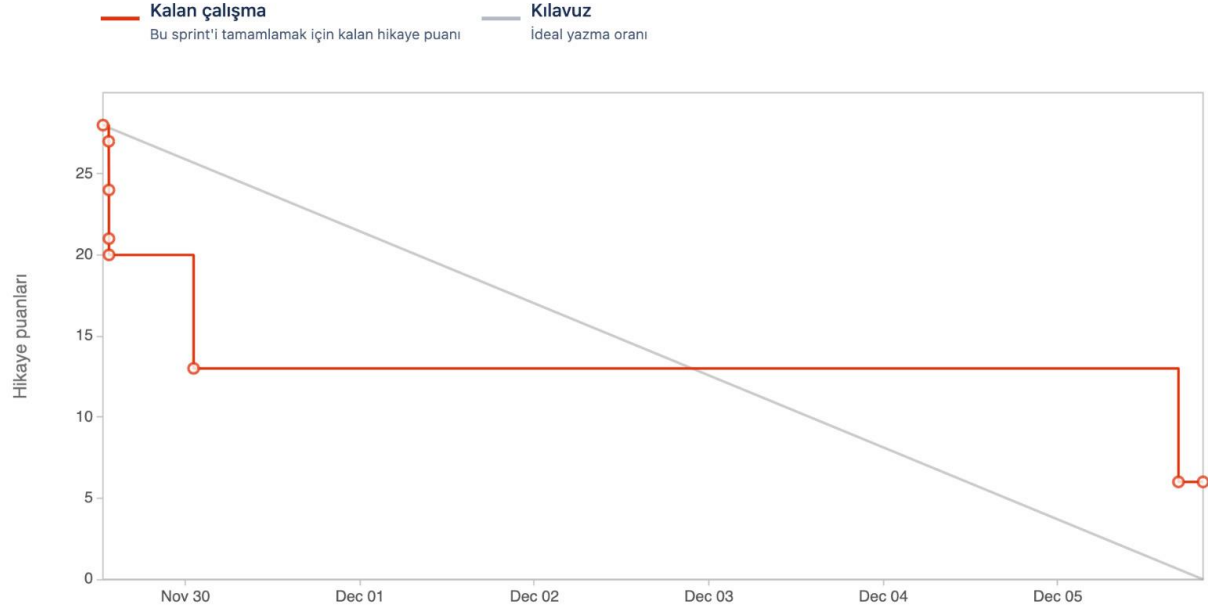

Also, users have the ability to categorize their content under self-defined genres, allowing them to quickly access items of a specific genre when desired. This platform tracks users' viewing, reading, and playing habits, providing them with a better understanding of their content preferences and enabling more organized content management.

Additionally, users can revisit the platform at any time to access their previous evaluations and comments on the content they've added. This way, they can observe how they have enriched their personal libraries over time and track their reactions to different pieces of content. Personal Library offers users a practical and personalized experience in managing their personal content.

## Burndown Charts:

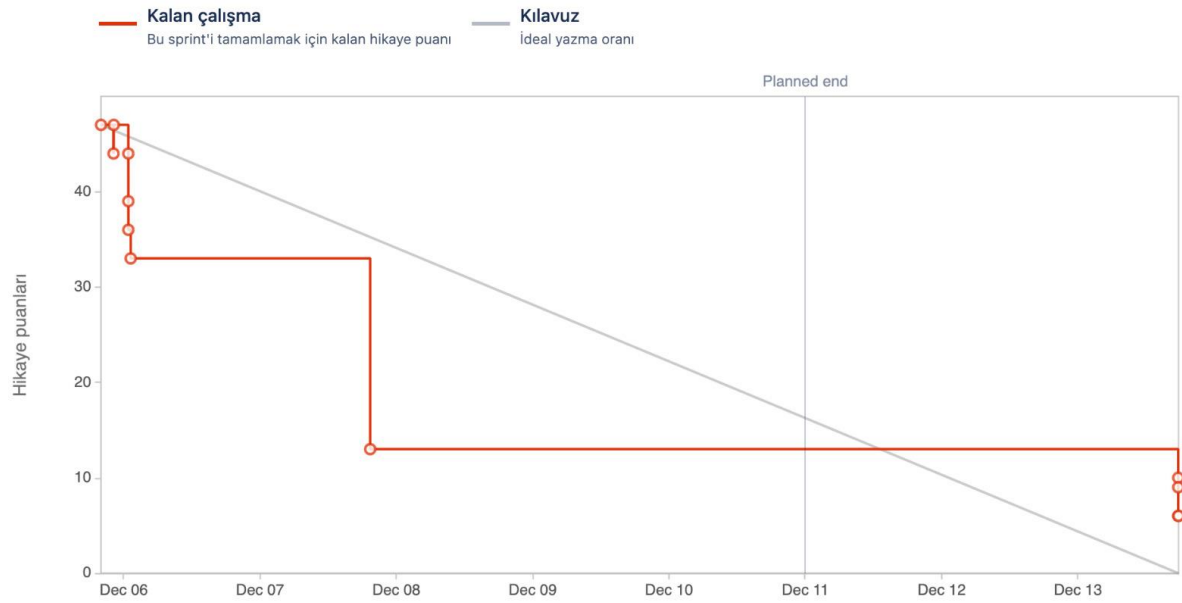

### Sprint 1:

Tarih - 29 Kasım 2023 - 5 Aralık 2023

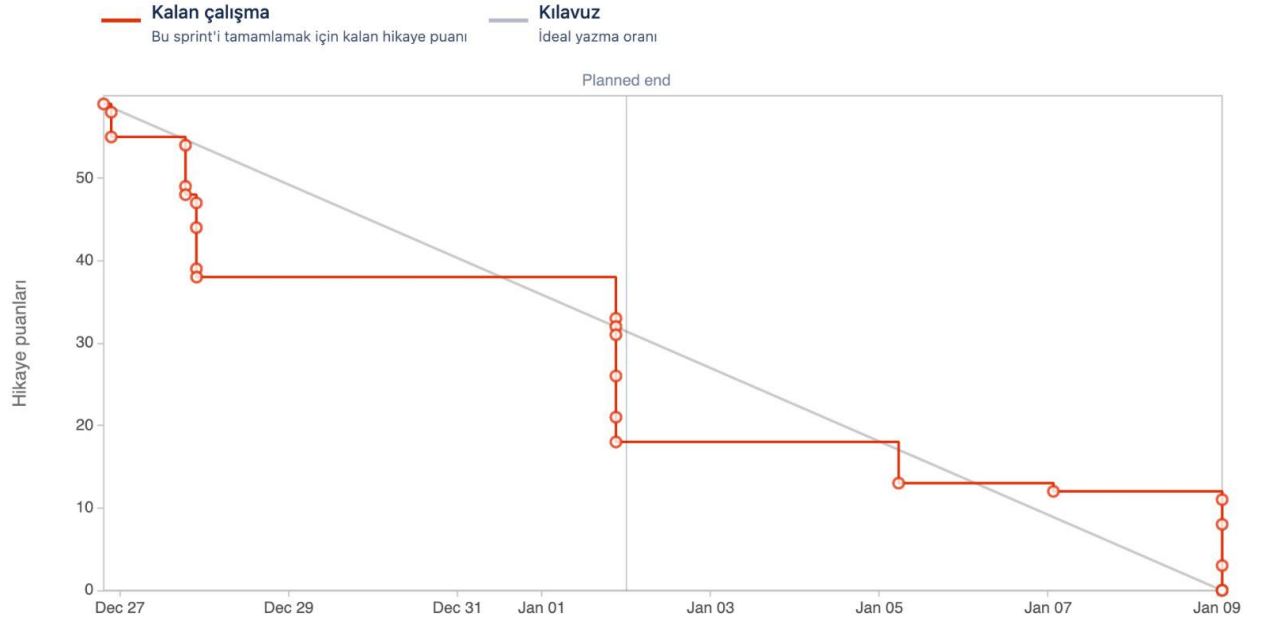

### Sprint 2:

Tarih - 5 Aralık 2023 - 11 Aralık 2023

### Sprint 3:

Tarih - 26 Aralık 2023 - 2 Ocak 2024

### Contribution Matrix:

#	Yusuf	Mert	Melih
Sprint1	100	0	0
Sprint2	10	60	30
Sprint3	5	35	60
